

IN THE SPECIFICATION

Please cancel the original abstract and substitute therefor the enclosed substitute abstract. The enclosed substitute abstract is marked up to show changes to the previous version of the abstract pursuant to 37 C.F.R. § 1.121(b)(2).

Please cancel the original specification and substitute therefor the enclosed substitute specification. The original specification was a literal English language translation of the Swiss priority document and, as such, contained numerous grammatical errors, awkward syntax, and generally did not conform to standard U.S. practice. The substitute specification corrects these matters and will greatly facilitate prosecution of the application. Applicants submit that no new matter is injected into the application by way of the substitute specification. A marked-up copy of the originally filed specification is enclosed for the Examiner's reference.
